

The information described below refer only to the second - short distance – race!

According to the demands of the supporters, the pre-start will be longer as usual, exactly 4 minutes, which means, everybody have to be at pre-start line 4 minutes earlier than his/her own start time.

You can see the map below, the layout of the Parking place, Event center and the Start-place. As you can see we tried to reduce the length of the distance between Even Center and the Start.

There is another demand for the supplier: the participants are required of giving signature to justify their participation. Therefore we ask every participants to be at Start-place 10 minutes before the own start time, where assistants will ask the signatures on a form, which is printed especially for this event. The forms are separated into woman and man participants

Thank you for understanding and thanks for your help in advance!
